

## Water Spray Machine

To evenly spray misted water on both sides of the products to form a thin layer of "ice coating" on the surface. It will keep the water in the products when freezing the meat in order to keep the freshness and tenderness, and reduce the excessive evaporation or "frozen loss".

## Product Display

### Features:

1. Evenly coating on both sides of the product, adding 2~5% weight
2. Spray volume can be adjusted
3. Easy to operate, easy to clean
4. The whole machine is made of stainless steel and food-grade materials
5. Stainless steel wire belt

## Product Specifications

1. Speed variable
2. Power: 380 V, 50 Hz, 0.37 kW
3. Dimension: 1200 x 600 x 650 mm
4. Weight: 200 KG
