

## Defrosting Machine

Heated by heat pump, the defrosting and chilling cabinet can be used for thawing frozen meat, dairy product, fish and seafood, vegetable and fruit, especially suitable for restaurant, catering center, canteen R&D center etc.

The temperature and humidity are controlled by PLC which is easier to adjust and set for different recipes. It will change to chilling after reaching the setpoint of the temperature to keep material fresh.

## Product Display

### Features and benefits:

1. Accurate control of temperature and humidity to guarantee thawing evenly
2. Minimal drip loss
3. Quick and safe defrosting process
4. Homogeneous high quality
5. Energy saving thanks to the innovative technology
6. Hygienic construction, easy to clean thawing and chilling in one machine

## Product Specifications

Model	Voltage	Power	Weight	Capacity	Size
HHAT-JD01	AC220 V / 50 Hz	2 kW	150 kg	100 kg/batch	122x74x200 cm
