Ice Glazing Machine

GoHunt **Ice Glazing Machine**, installed at the inlet or outlet of a freezer, utilizes an atomization system to evenly spray water onto both sides of products, forming a delicate "ice coating" that preserves freshness and adds weight. The automatic glazer is mainly used for glazing ice for frozen shrimp, fish, shellfish, chicken, meat products, vegetables and other refrigerated foods. With adjustable spray volume, user-friendly operation, and durable stainless steel construction, this glazing solution enhances product quality by reducing frozen loss and ensuring even coating. The ice glazing equipment can be customized based on customer request.

Key Features and Benefits

1. **Even Coating:** Ensures an even coating on both sides of the product, preserving freshness and adding 2-5% weight.
2. **Adjustable Spray Volume:** Allows flexibility in controlling the amount of water applied.
3. **User-Friendly Operation:** Easy-to-use knob control with pressure gauge display for intuitive operation.
4. **Durable Fabrication:** Crafted from stainless steel and food-grade materials, ensuring longevity, sanitation, and product safety.
5. **Stainless Steel Wire Belt:** Utilizes a durable stainless steel wire belt for efficient water distribution and smooth product conveyance.
6. **Variable Frequency Speed Control:** Allows operational flexibility based on processing requirements.
7. **Water Collection Tray:** Directs water flow away, preventing the accumulation of mixed product debris.

Product Specifications

1. **Variable Speed:** Based on your processing needs.
2. **Power:** 380 V, 50 Hz, 0.37 kW.
3. **Dimension:** 1200 x 600 x 650 mm.
4. **Weight:** 200 KG.
