

GoHunt

Meat Slicer

GoHunt **Meat Slicer** is designed to deliver optimal cutting results for a wide range of applications. Featuring side loading and a rear tiger-claw-type grabber, this slicing machine also employs a servo motor-driven continuous feeding device and an intelligent control system to cut raw materials into uniformly thick slices. Outputs can be grouped and conveyed to the next processing step via a conveyor belt. Whether dealing with boneless or bone-in meats, fish, fruits, or vegetables, this industrial food slicer produces clean-cut slices with a high yield.

Key Features and Benefits

1. **Unique Design:** Engineered for optimal cutting results.
2. **Versatile Compatibility:** Handles both bone-in and boneless items with precision.
3. **Wide Range of Applications:** Ideal for various products, including meat, fish, sausage, salami, bacon, cheese, and more.
4. **Blade Options:** Different blades for different raw materials, offering flexibility for cutting.
5. **PLC Controller:** Enables grouping and portioning of finished products into 1 to 99 slices for customization.
6. **Outfeed Conveyor Belt:** Measures 1280 x 310 mm for efficient product conveyance to the next processing step.

Product Specifications

Technical specifications	ZKPJ-21	ZKPJ-25	ZKPJ-25L
Cuts/minute	210	210	210
Loading dimension W x H x L	210x230x680 mm	250x230x680 mm	250x230x680 mm
Cutting thickness (mm)	1-30	1-30	1-30
Power supply	380V 3.8KW	380V 4.8KW	380V 5KW
Weight	420KG	500KG	520KG
L x W x H	1880×820×1280	1880×1050×1530	2280×1050×1240
Discharge conveyor (mm)	No	No	1280x310
Portion groups	No	No	1-99 pcs
